

ASSESSMENT & TREATMENT USING THE SOS APPROACH TO FEEDING

The Sequential Oral Sensory (S.O.S) Approach to Feeding workshop is a trans-disciplinary program for assessing and treating children with feeding difficulties and weight/growth problems from birth to 18 years. It integrates posture, sensory, motor, behavioral/learning, medical, and nutritional factors to comprehensively evaluate and manage children with feeding/growth problems. The 4-day Basic Conference is designed for babies, toddlers and small children.

Instructors:

Dr. Kay A. Toomey is a Pediatric Psychologist who has worked with children who don't eat for almost 30 years. She has developed the SOS Approach to Feeding as a family centered program for assessing and treating children with feeding problems. Dr. Toomey speaks nationally and internationally about her approach.

Dr. Erin Sundseth Ross is a Speech Pathologist with a Doctoral degree in Clinical. She is the creator of the SOFFI Method SM, a feeding program for use in the NICU. She has specialized in the development of feeding skills, and the etiology and treatment of feeding and growth problems in infants and very young children from initial hospitalization through the first 5 years of life.
